Do Do Do

Diagram: Three boxes representing a 4-beat measure. Each box contains three solid black dots (representing 'Do') in the first three positions and three open circles in the last three positions.

4 4

Do Do Re

Diagram: Three boxes representing a 4-beat measure. The first two boxes each contain three solid black dots (representing 'Do') in the first three positions and one solid black dot in the fourth position. The third box contains one solid black dot in the first position and three open circles in the last three positions (representing 'Re').

4 4

Do Re Re

Diagram: Three boxes representing a 4-beat measure. The first box contains three solid black dots (representing 'Do') in the first three positions and one solid black dot in the fourth position. The next two boxes each contain one solid black dot in the first position and three open circles in the last three positions (representing 'Re').

4 4

Re Re Re

Diagram: Three boxes representing a 4-beat measure. Each box contains one solid black dot in the first position and three open circles in the last three positions (representing 'Re').
