

# Cyberbullying

---

## Tips for Parents

### Parents:

1. Engage your child in a conversation about how to behave online (Netiquette). Work with your child to complete a Word Scramble and Word Find.
2. Look at your child's online profile and buddy list.
3. Talk to your children about the dangers of posting too much information.
4. Talk to your children about respecting others.
5. Explain that whatever is posted online stays online forever (the content that is online now may haunt them in the future).
6. Explain to your child that they are not anonymous on the Internet.
7. Don't threaten to take away or restrict your child's use of the computer. This can prevent children from telling you that they have been Cyberbullied.
8. Complete a Respect Contract with your child.
